# MESSAGE FROM THE DEAN

Congratulations to each member of the graduating class and best wishes for continued success to you and to all students who are not yet graduating.

You may not realize this, but faculty members are ambivalent about having their students graduate. There is a great sense of pride in the achievement of those whom you hope have learned something from you, but this coupled with a sense of loss. Faculty members do get attached to students and when they graduate, the knowledge that you will not see them again or see them very infrequently is painful.

Teaching is just as much about caring as is nursing. I bet that you did not know that when you got a "C" on a paper that "C" stood for caring and it meant that we cared enough to want you to do better. I am teasing you, but one of the challenges of teaching is to be objective about students' achievement while caring deeply about them as individuals.

Since many students about whom we care a great deal are about to graduate, let me pass on a passage I found in a paper by Lutz, EM, Petronic, K, and Miller, C, in the January, 1991 edition of the Journal of Nursing Education. The passage itself is anonymous.

Excellence can be attained if you . . .  
Care more than others think is wise . . .  
Risk more than others think is safe . . .  
Dream more than others think is practical . . .  
Expect more than others think is possible.

To the graduating class, I wish you a long, happy and fulfilling life of caring, risking, dreaming and expecting. To that I will add, achieving nothing less than excellence.

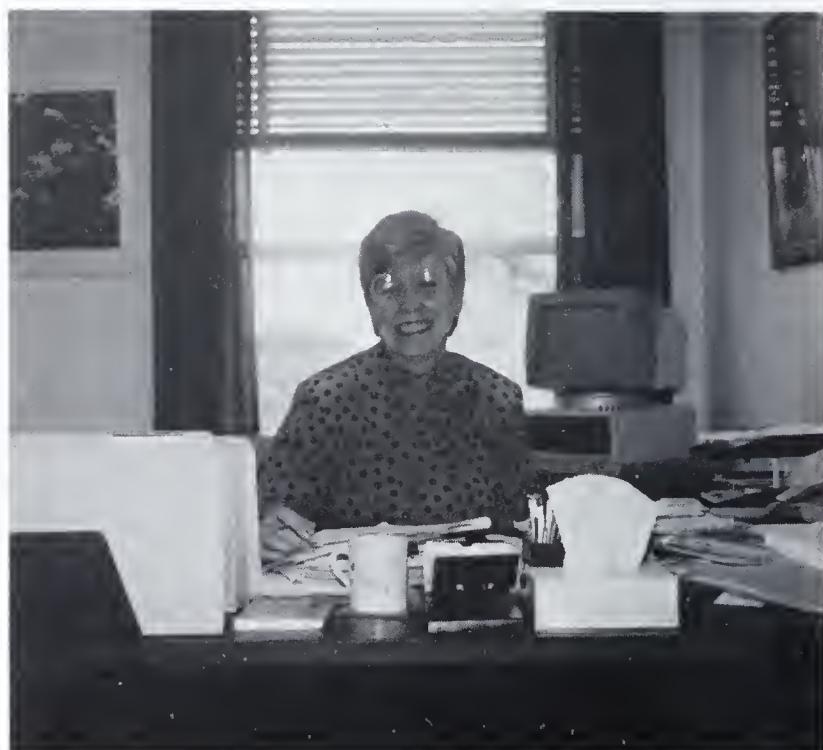

Dorothy Pringle  
Dean

## FROM THE CHAIRPERSON

Congratulations to the class of 1991 on your graduation from the Faculty of Nursing. You are a special class! Throughout the four years of your program, I have witnessed your activity and involvement, and I trust that your creativity and commitment to positive change will continue through many years of nursing ahead.

# FROSHWEEK

An entire revamping of the orientation system was necessary in order to better foster a greater sense of togetherness, integrity and community. This year's orientation did all the above and more. Little things were added such as the Nursing Oath, Nursing Olympics, Nursing War Games and of course, the first ever NURSING NITE PUB!

Besides the social points, those year's orientation also included communal aspects including a Nursing Breakfast and a Nursing Lunch. An educational component was added. Topics dealing with personal safety, health education and STD awareness as well as an hour tour of U of T.

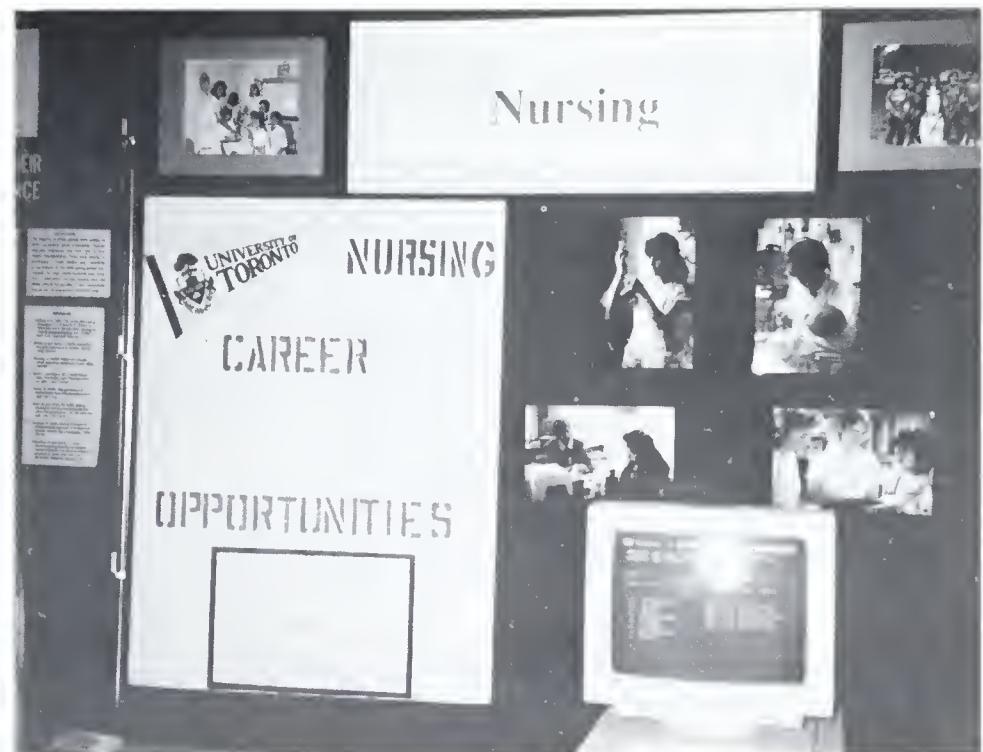

Although there were great events this year, the one thing I shouldn't omit is those people who made the entire week possible. THE FROSH! You were fantastic! You put your heart, lungs, legs and arms into Frosh Week. The Frosh Patrol and I salute you! Keep the energy for next year's crop!

# CUNSA — Regional

This year the University of Toronto hosted the CUNSA Regional Conference on October 19-20th. The topic was Drug and Alcohol Abuse in Patient Care and Nursing. The conference was a tremendous success. We received government funding and fifty students were sponsored to attend the conference giving us representation from all universities with nursing programs in the province. This has not been done in a long time.

The people were interesting, the conference was educational, the speakers were dynamic and the banquet was . . . enlightening. Many months of planning paid off with the huge success. Many thanks to all those people who helped coordinate the conference including Joan Brailey and Lorraine Boyle. I was happy to have been a part of it.

# The Students' Council.

Looking back on this past year as president, I have more memories than I have paper to write on. All the events, from Frosh Week to Wine and Cheese, pubs and the semi-formal, athletic events, lunch-time seminars etc, demonstrates the dedication and organization of the people who composed the council. The directors, reps, and class presidents, as well as those executive made me proud to be the president of such a unique, eager group. I am happy to say there were far more good memories than bad, and I hope the rest of council agrees. I feel I accomplished the majority of what I set out for myself. The meeting although long ran smoothly and I must apologize to those I cut off and told "we're not at that section yet!"...does this sound familiar Lorraine?

I must inform those not on Student's Council that the only credit I can take is for chairing the meeting of your remarkable Council. The people of the Council did it all; they deserve the credit and I am happy and proud to have been chosen to represent the 1990-91 Student's Council and Student Body.

I wish next year's Council the best of luck in all their endeavours and hope your year is as good, if not better than ours.

# Finally, A Dermatologist That Makes House Calls.

With Vaseline® Dermatological Formula® you can care for your dry, chapped skin at home.

Our professional formula was tested by dermatologists. After four separate clinical studies, Vaseline Dermatological Formula was found to be more effective at relieving dryness, roughness and scaling than Keri Lotion.

These test results aren't so surprising. Our non-greasy formula has Petrolatum, the dermatologist-recommended ingredient that is known for its ability to retain moisture. Vaseline Dermatological Formula

cloaks skin in a shield that protects and helps to seal out the harsh environment.

As well, women tested expressed a preference for Vaseline Dermatological

Formula's ability to improve softness and reduce the tautness of dry skin. In fact, our formula was preferred over Keri by three to one.

If you need relief from dry, chapped skin, choose the lotion that has a Dermatologist in its name. Vaseline Dermatological Formula.

Proven More Effective.
